DESCRIPTION OF THE PREFERRED EMBODIMENT

Specific embodiments of the invention will now be described with reference to the accompanying

diagrams as seen in Figures 1 and 2 which illustrates in schematic fashion an embodiment of server and client network to which this invention relates. Although referred to hereonin as "client" the invention has particular uses with respect to a network comprising a server which allows the transmission of data for updating, changing or otherwise amending the operation of a series of clients in the form of broadcast data receivers connected to a network and hence in turn to the sever. Typically each broadcast data receiver is located in a different premises of a subscriber to a television system and the server is controlled and operated by the service provider and the data is transferred via a communications link to which each of the broadcast data receivers is connected.

On Page 4, as amended in the Preliminary Amendment, delete the header as it appears on Page 4, line 13 after "relates" as follows:
